

## INTRODUCTION OF THE HYPOTHESIS OF LIFE

### *Second warning*

Strangely enough 50 years ago the idea of Stefan Denaerde that mankind could reach completion and transfer itself by the power of the mind to Heaven leaving the material plane, was alien to say the least. Actually what was meant is that the evolution of humanity is finite or comes to an end. Even modern sciences came to a similar insight considering the enormous progress in all fields of knowledge.

A short overview together with the explanation is given in the context of present-day understanding. To that effect the warning was not only the potential of a sudden shift of Earth rotation axis, but more subtle it is pointed out that the immaterial continuation of living intelligent beings acquires an end game for evolution. See [hypothesis of Life](#). As pointed out, the fulfilment of mankind is binary determined as  $2^{40} = 1.1$  thousand billion but let us say it comes to 20 billion people in a diversifications of souls including the dead over the duration of the evolution of mankind.

As is stated the ultra fast dark matter medium carries as well gravity as all living bio matter surrounds us. And it is likely that by the power of mind or thoughts one can manipulate matter but it can presently only be used to dominate other minds not equally evolved. Since the above paragraph seems to be far-fetched it is better not to panic or speculate and keep one's head and ask can one prove the power of mind? And Yes. Show to mankind that some people or a group of people, specially trained in deep meditation and concentration, can overcome gravity as was aeons ago suggested by Buddha or Jesus. By self levitation one shows that one can influence gravity making use of the ultra fast carrier medium. It certainly is something, let us say weighing 100 kg and by levitation using 5 to 10 watt brain power. Discussed in [hypothesis of Life](#) followed by [why qubit based](#) and [Explanation of qubit universe](#) .

*In conclusion* All understanding why the field of life (ultra fast medium) is conform the physics of gravity and explained in [gravity website](#)
